AL-ATTAL INTEGRATED ENERGY COMPANY

AL-ATTAL INTEGRATED ENERGY COMPANY: **Empowering Energy Solutions**

Introduction

Al-Attal Integrated Energy Company is an organization renowned for its innovative and progressive approaches to delivering all-encompassing solutions within the domain of electrical generators. We provide an extensive array of services, including generator sales, rental, and maintenance, in an effort to achieve the highest standards. Our range of capabilities includes fabrication and design of diesel tanks, generator enclosures, exhaust pipes, and barrels louvers.

The products and services that we offer are highly customized and integrated. Supporting and providing comprehensive solutions for a diverse range of sectors is within our capabilities, thanks to our infrastructure, technologies, and people. We are able to provide our clients with first-rate service and products since we sell the most recent technology in power generators. The loyal, diligent, and competent employees are the reason we've been successful.

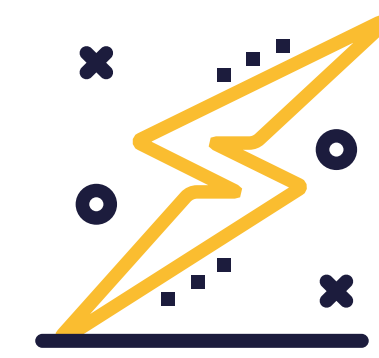

Thanks to our clients' faith in us, our high-quality products, and our unwavering dedication to providing the finest service possible, we have risen to the top of the energy generating industry and are rapidly expanding our business.

AL-ATTAL INTEGRATED ENERGY COMPANY: **Empowering Energy Solutions**

Our Journey

Al-Attal Integrated Energy Company, is dynamic and forward-thinking. Its main focus is on offering complete solutions for energy generators. Because we are dedicated to doing the best job possible, we sell, rent, and maintain generators, among other things. We can plan and build generator enclosures, diesel tanks, exhaust pipes, and barrels louvers, among other things.

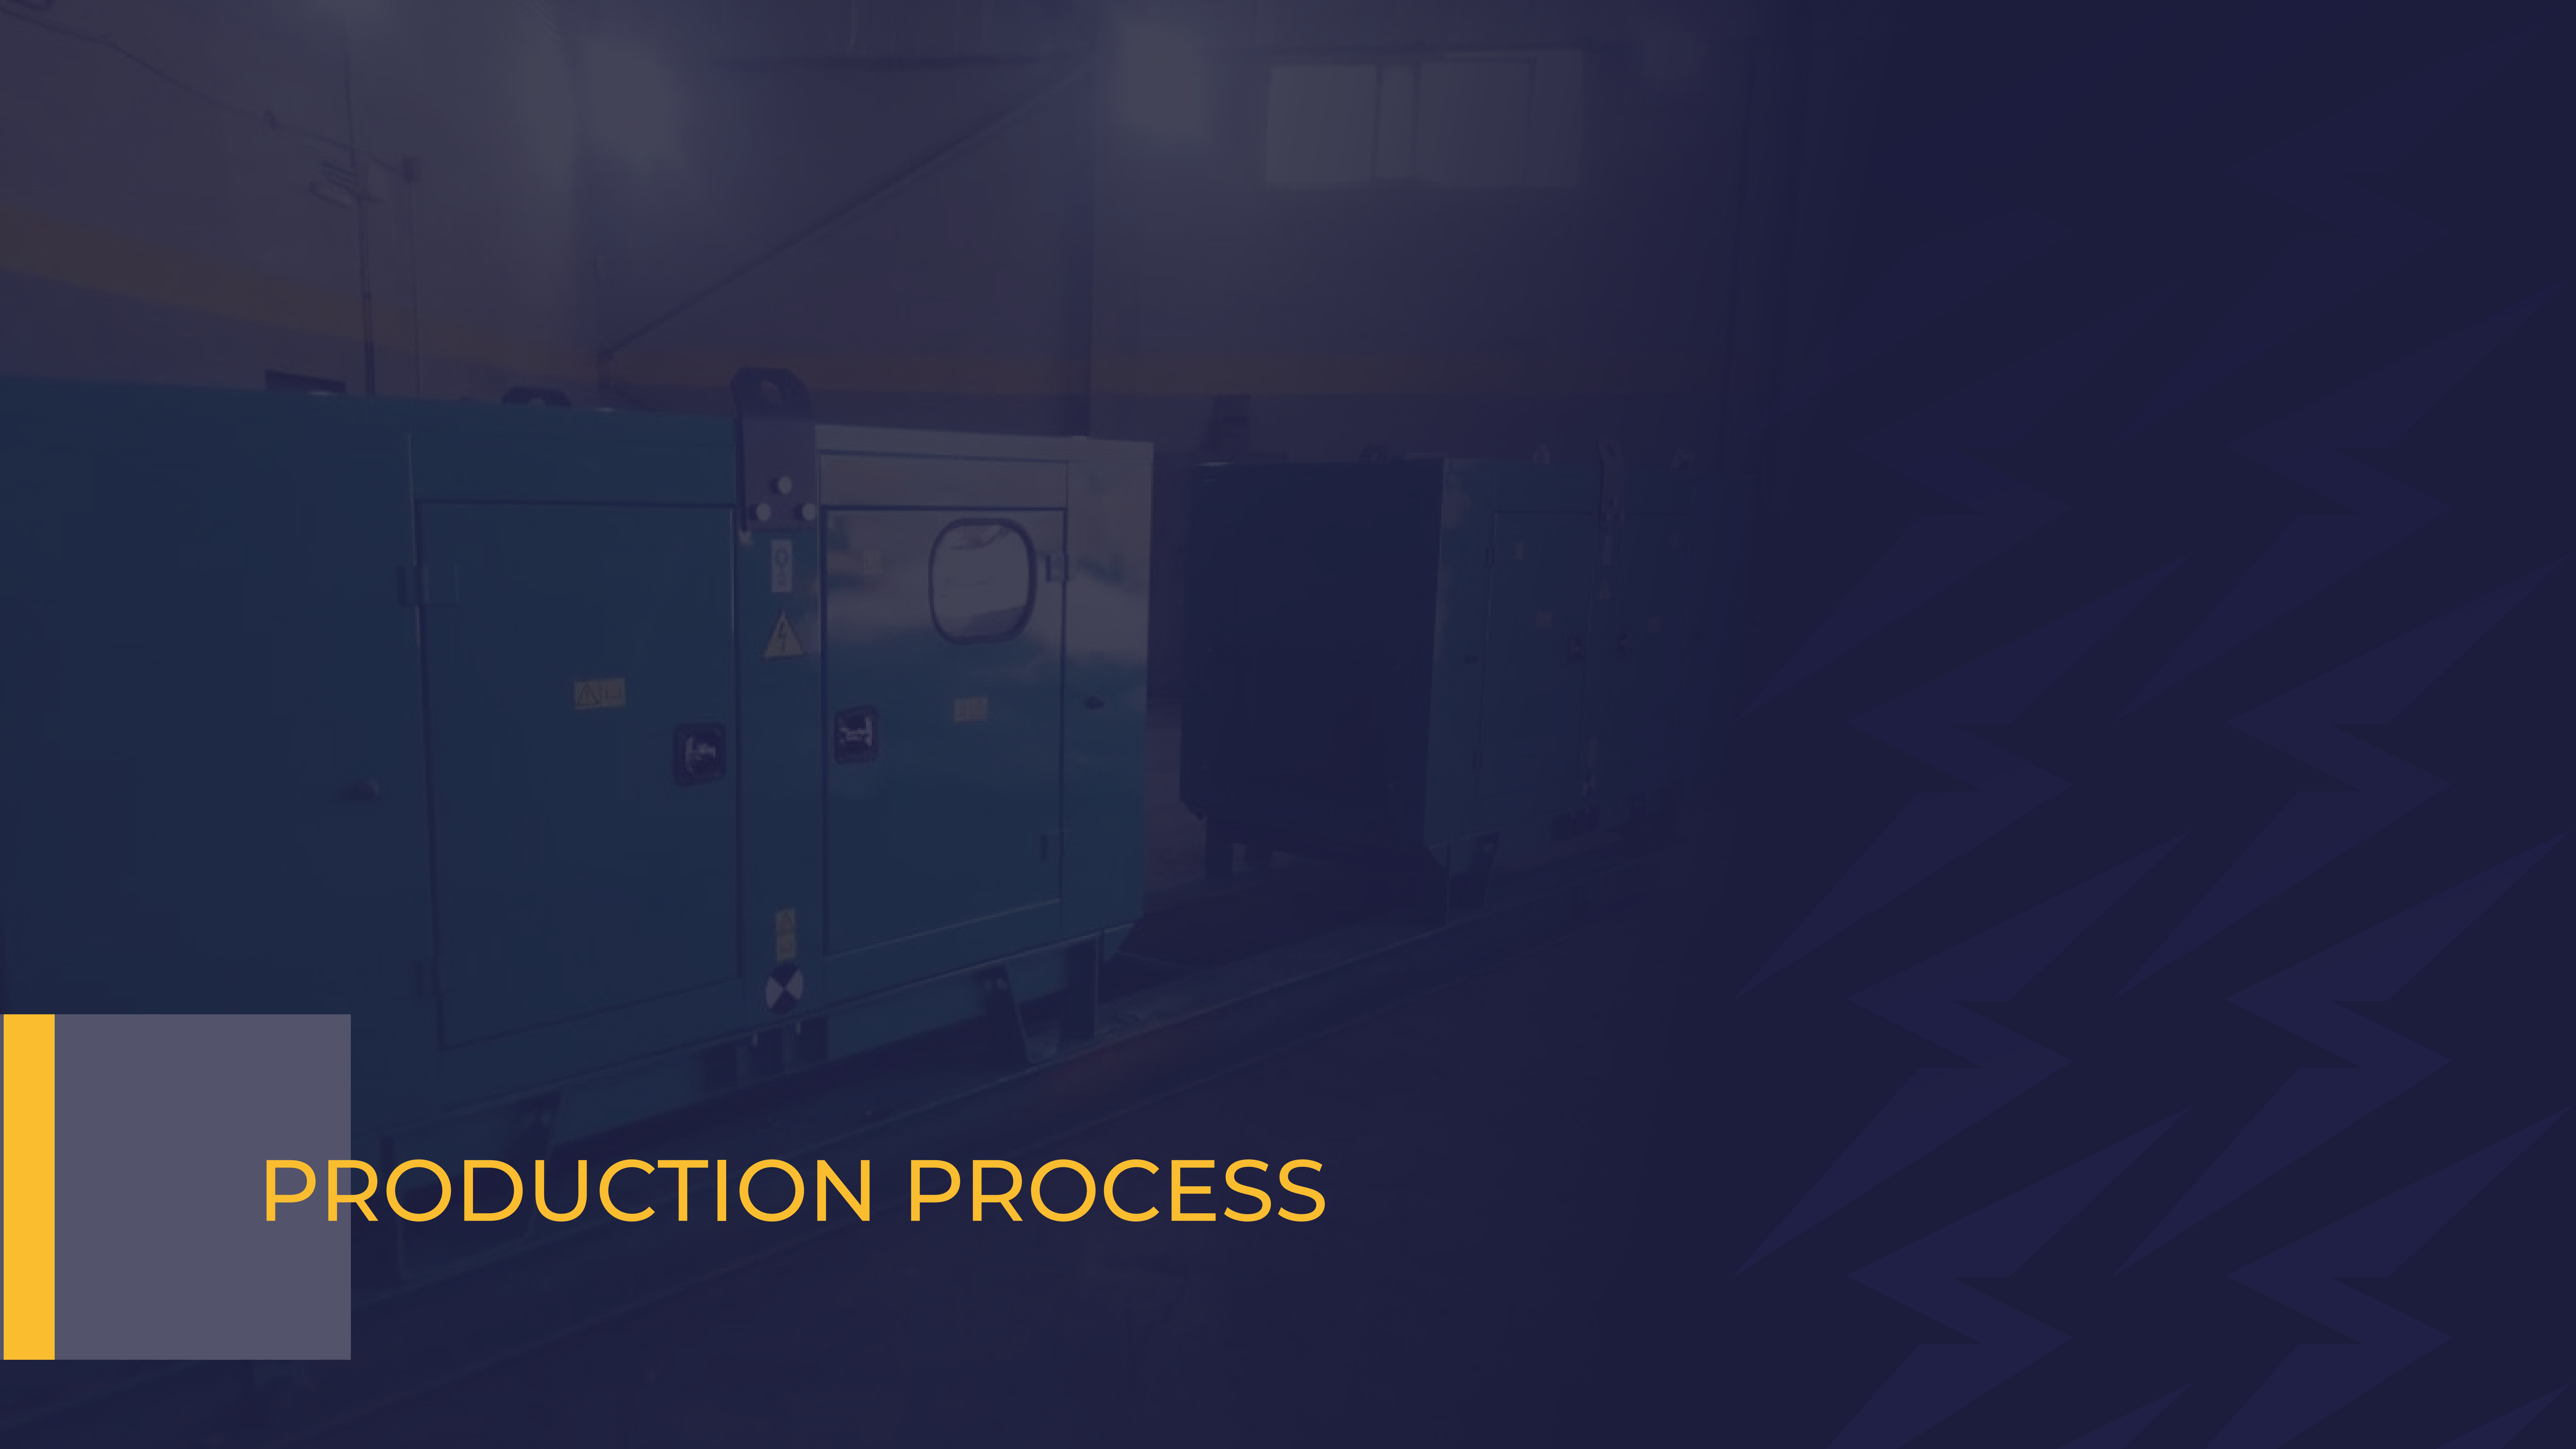

AL-ATTAL INTEGRATED ENERGY COMPANY: **Empowering Energy Solutions**

Our Origin

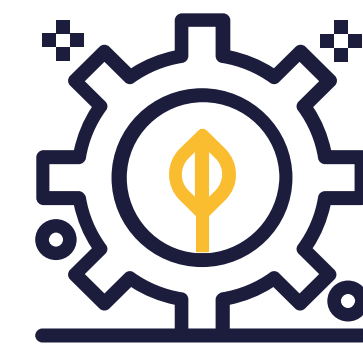

Our expedition commenced in Jordan in 2013, where our inaugural enterprise established a substantial influence within the domestic market. By virtue of our commitment, ingenuity, and strategic alliances, we have attained extraordinary success in collaboration with industry titans.

Established in accordance with the ambitious Saudi Arabia Vision 2030 and the visionary objectives established by His Royal Highness, Crown Prince Mohammed bin Salman, Al-Attal Integrated Energy Company was established. It is with great regard that we contribute to the energy landscape of the kingdom, ensuring dependable power solutions and accommodating a variety of requirements.

To be the best service provider possible to our customers, we offer the best electric generators, reliable door-to-door delivery, and after-sales service at prices that are competitive with the market. We keep building on our strong name for quality and speedy service while providing dependable and custom solutions that meet our customers' needs.

PRODUCTION PROCESS

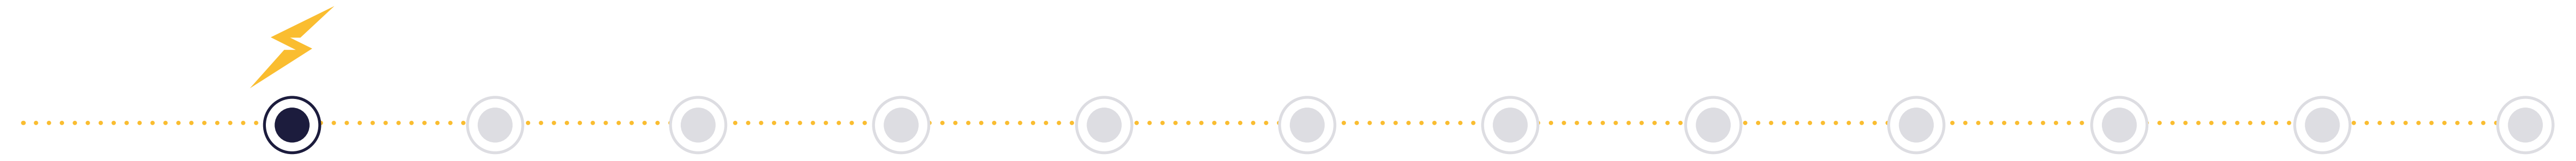

PRODUCTION PROCESS:

At Al-Attal Integrated Energy Company, we take pride in our meticulous production process, ensuring that each component of our generators meets the highest standards of quality and performance. Our production process for the canopy, or enclosure, involves several carefully orchestrated steps to ensure optimal functionality and durability.

1. **Material Selection and Fabrication**
2. **Sound Insulation**
3. **Noise Reduction**
4. **Assembly and Welding**
5. **Internal Coating and Finishing**
6. **Accessories Installation**
7. **Chassis Installation**
8. **Customization and Quality Assurance**
9. **Louvers and Ventilation**
10. **Ducts for Filtration and Radiator**
11. **Diesel Tanks**
12. **Mobile Generator Units**

By adhering to stringent quality control measures and leveraging cutting-edge manufacturing techniques, we deliver enclosures that not only protect generators but also contribute to a quieter and more efficient energy generation process.

PRODUCTION PROCESS:

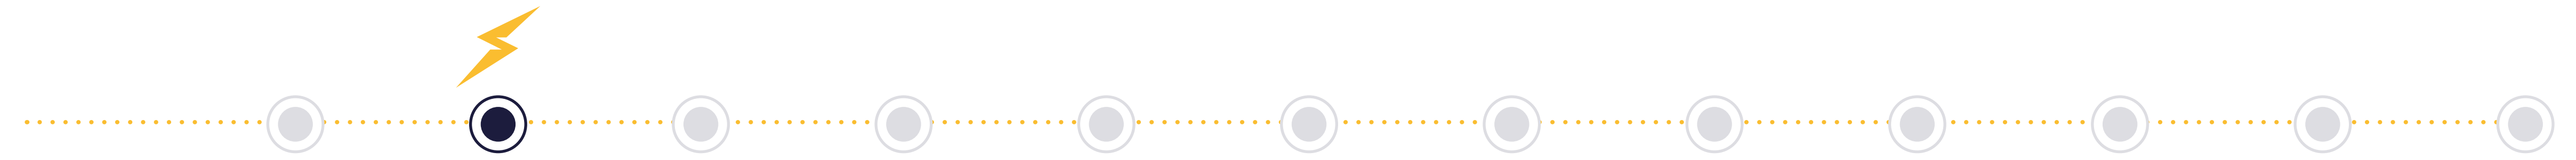

1.

Material Selection and Fabrication:

Our canopies are fabricated using high-quality black steel with a thickness of 2 millimeters. These steel sheets are precisely shaped and formed in our state-of-the-art manufacturing facility, ensuring consistency and precision in every detail.

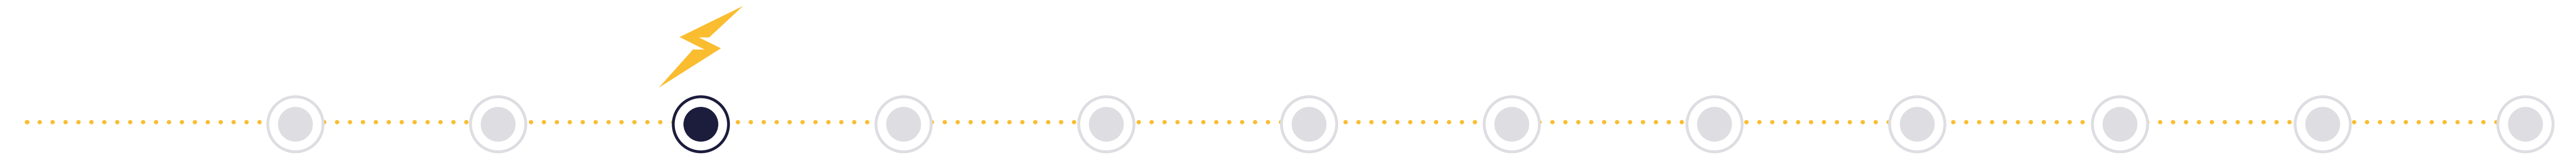

2.

Sound Insulation:

Sound insulation is a crucial aspect of our canopy production process. We utilize rock wool insulation with a density of 70-80 kilograms per cubic meter and a thickness of 5 centimeters to effectively isolate the generator's noise. The rock wool insulation is reinforced with galvanized mesh to enhance its structural integrity.

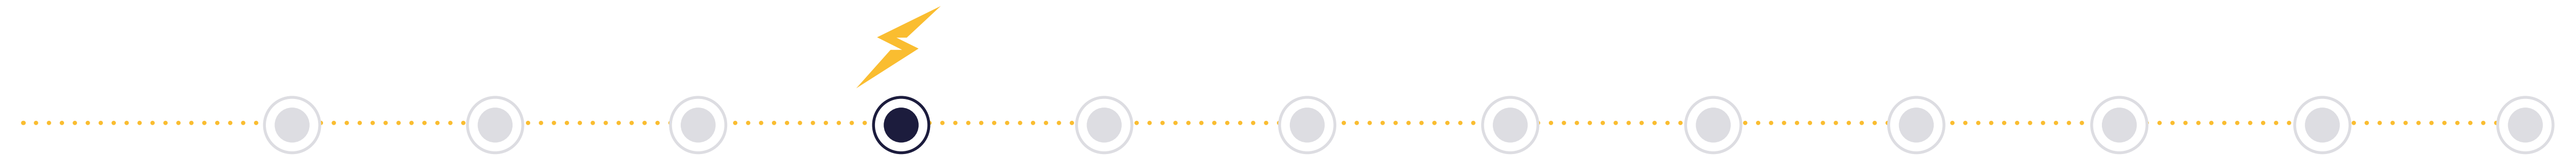

3.

Noise Reduction:

Our canopy design effectively reduces noise levels emitted by the generator, attenuating sound from 85 decibels to as low as 60 decibels at a distance of 3 meters, ensuring minimal disturbance to surrounding environments.

PRODUCTION PROCESS:

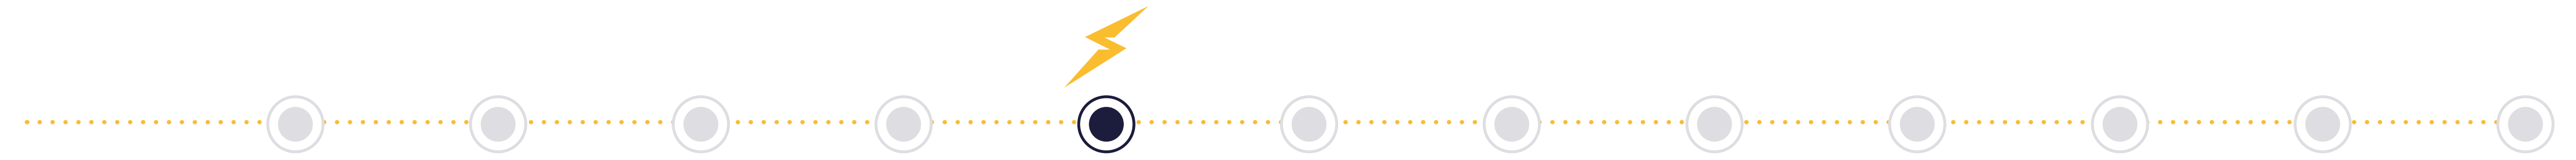

4.

Assembly and Welding:

The canopy chambers are assembled using CO2 welding, ensuring robust construction and seamless integration of components. This welding process guarantees a secure and stable enclosure for the generator.

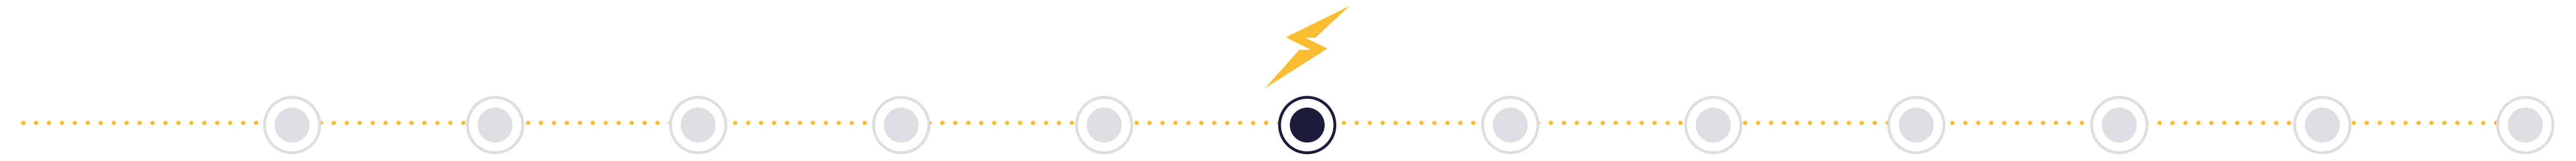

5.

Internal Coating and Finishing:

After assembly, the interior of the canopy is coated with galvanized sheet metal to provide additional protection against rust and corrosion. The exterior coating is customizable based on the client's preferences, with options for anti-corrosion and aesthetic finishes.

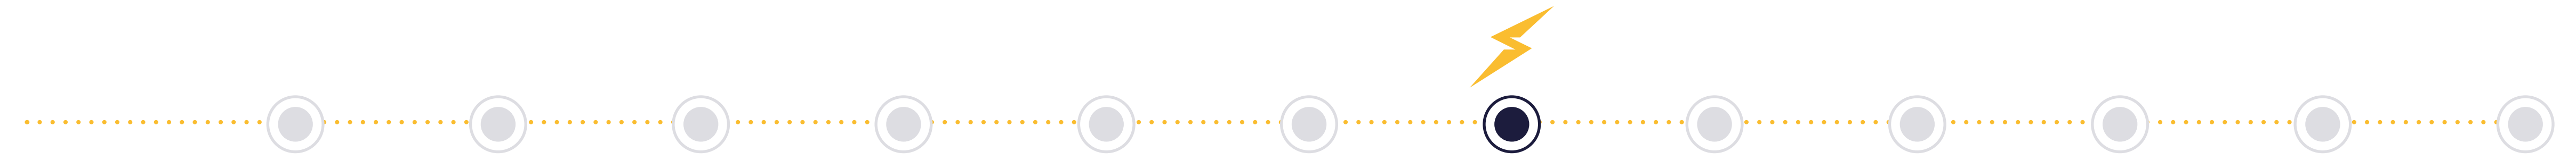

6.

Accessories Installation:

The canopy is equipped with various accessories to enhance functionality and safety. This includes the installation of handles, hinges, and rubber seals on doors to prevent noise leakage and minimize collisions between aluminum panels and doors.

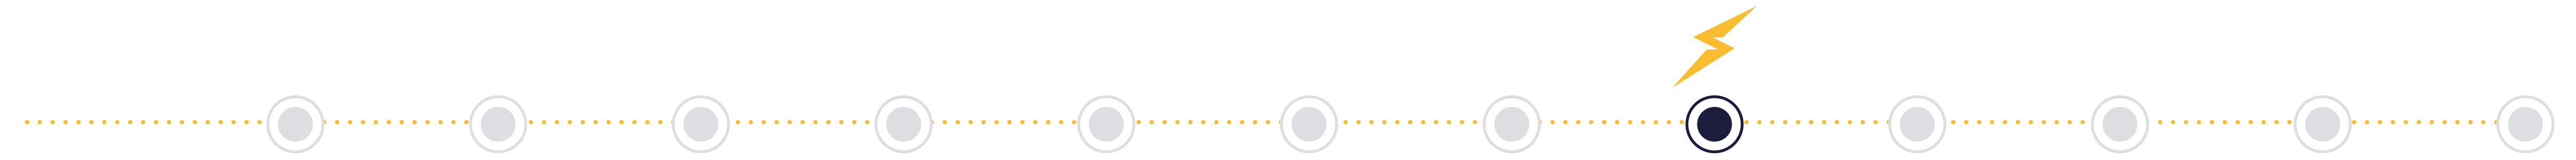

7.

Chassis Installation:

To ensure stability and longevity, chassis are installed within the generator enclosure. These chassis serve to support the generator and extend the lifespan of the enclosure, maintaining its structural integrity over time.

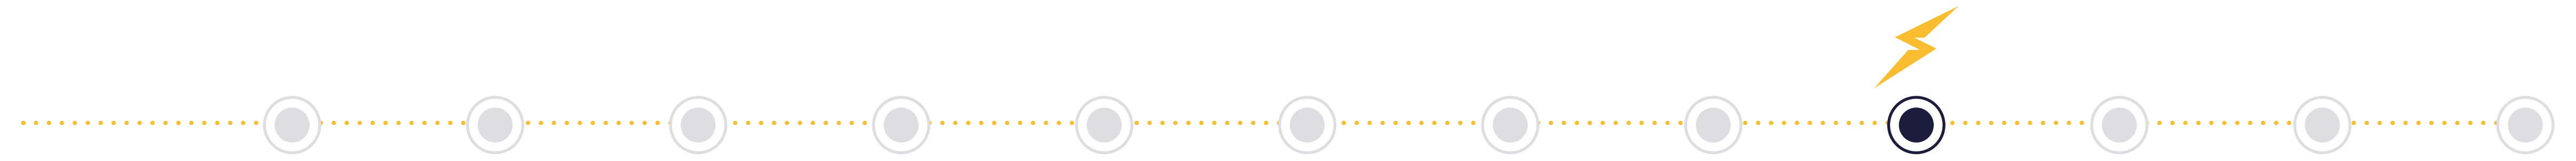

8.

Customization and Quality Assurance:

While we offer standard enclosure structures, we also specialize in custom fabrication to meet the unique requirements of our clients. Our production team works closely with customers to design and manufacture enclosures in various shapes and sizes.

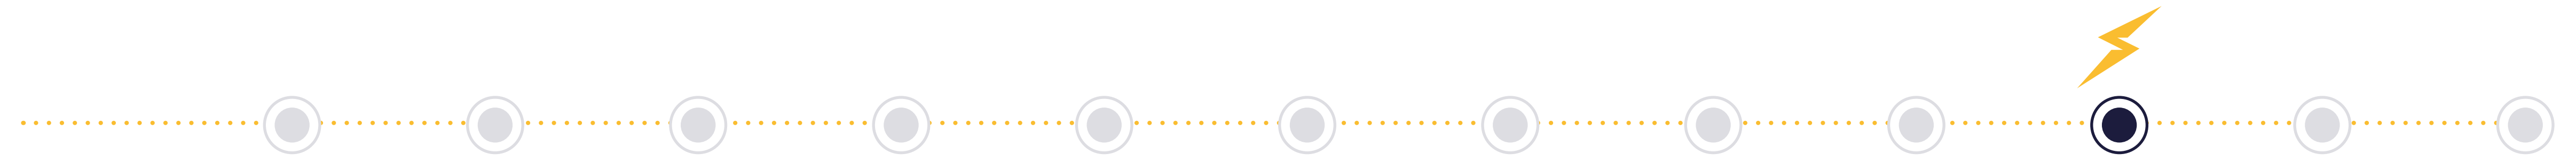

9.

Louvers and Ventilation:

In addition to generator enclosures, we specialize in designing and manufacturing louvers, which are essential for site ventilation (such as hangars) where generators are housed. Louvers facilitate airflow between generators, aiding in cooling and maintaining optimal operating conditions.

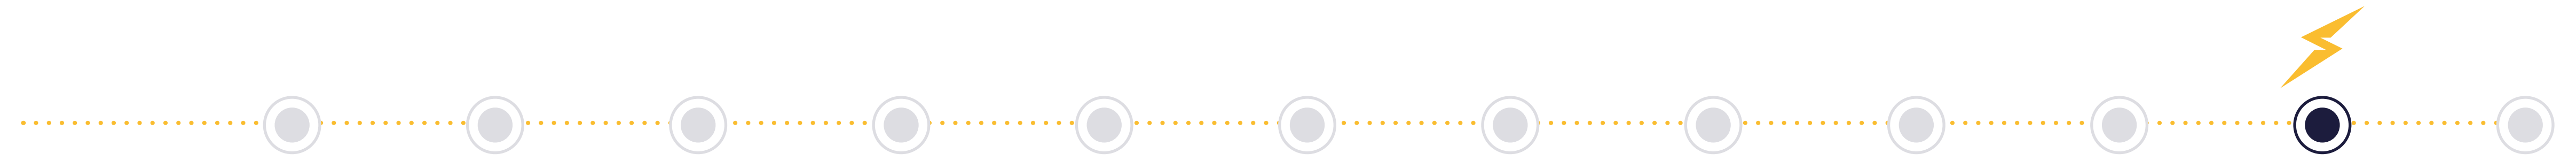

10.

Ducts for Filtration and Radiator:

Our production extends to manufacturing ducts for filtration and radiator systems. These ducts play a crucial role in cooling the generator within the enclosure. Filtration ducts ensure clean air intake, while radiator ducts facilitate efficient heat dissipation, contributing to the overall performance and longevity of the generator.

11.

Diesel Tanks:

We fabricate diesel tanks tailored for generators, available in both internal and external configurations. Internal tanks are designed to fit within the generator enclosure, seamlessly integrating with the generator chassis for efficient space utilization. External tanks provide alternative fuel storage options, catering to diverse installation requirements and preferences.

12.

Mobile Generator Units:

In addition to stationary generator solutions, we offer mobile generator units equipped with wheels for easy transportation between locations. These mobile units are designed for versatility and convenience, allowing for rapid deployment and flexibility in power generation applications.

CONTRIBUTING TO SAUDI ARABIA'S VISION 2030:

CONTRIBUTING TO SAUDI ARABIA'S VISION 2030:

Al-Attal Integrated Energy Company is an organization renowned for its innovative and progressive approaches to delivering all-encompassing solutions within the domain of electrical generators. We provide an extensive array of services, including generator sales, rental, and maintenance, in an effort to achieve the highest standards. Our range of capabilities includes fabrication and design of diesel tanks, generator enclosures, exhaust pipes, and barrels louvers.

Mission:

At Al-Attal Integrated Energy Company, our mission is to revolutionize the energy sector by providing innovative and sustainable solutions that empower businesses and communities. Through cutting-edge technology, unparalleled expertise, and unwavering dedication, we strive to enhance efficiency, reliability, and accessibility in power generation, thereby fueling progress and prosperity.

Aligned with Vision 2030:

Aligned with the ambitious goals of Vision 2030, we at Al-Attal Integrated Energy Company are committed to driving economic diversification, fostering innovation, and promoting sustainable development in Saudi Arabia. By leveraging our expertise and resources, we aim to contribute significantly to the kingdom's transition towards a knowledge-based economy and a thriving energy sector, thereby ensuring long-term prosperity for generations to come.

A full-page background image with a dark blue overlay. It depicts a male worker in profile, wearing a white hard hat and a high-visibility orange safety vest over a dark long-sleeved shirt. He is holding a tablet computer with both hands and looking at the screen. The background shows industrial equipment, including pipes, valves, and a large blue cylindrical tank. The right side of the image features a stylized, light blue zigzag or chevron pattern.

SERVICES:

OUR SERVICES:

Generator Sales:

Offering a wide range of high-quality electric generators tailored to meet the specific needs of our clients, ensuring reliable and efficient power generation solutions.

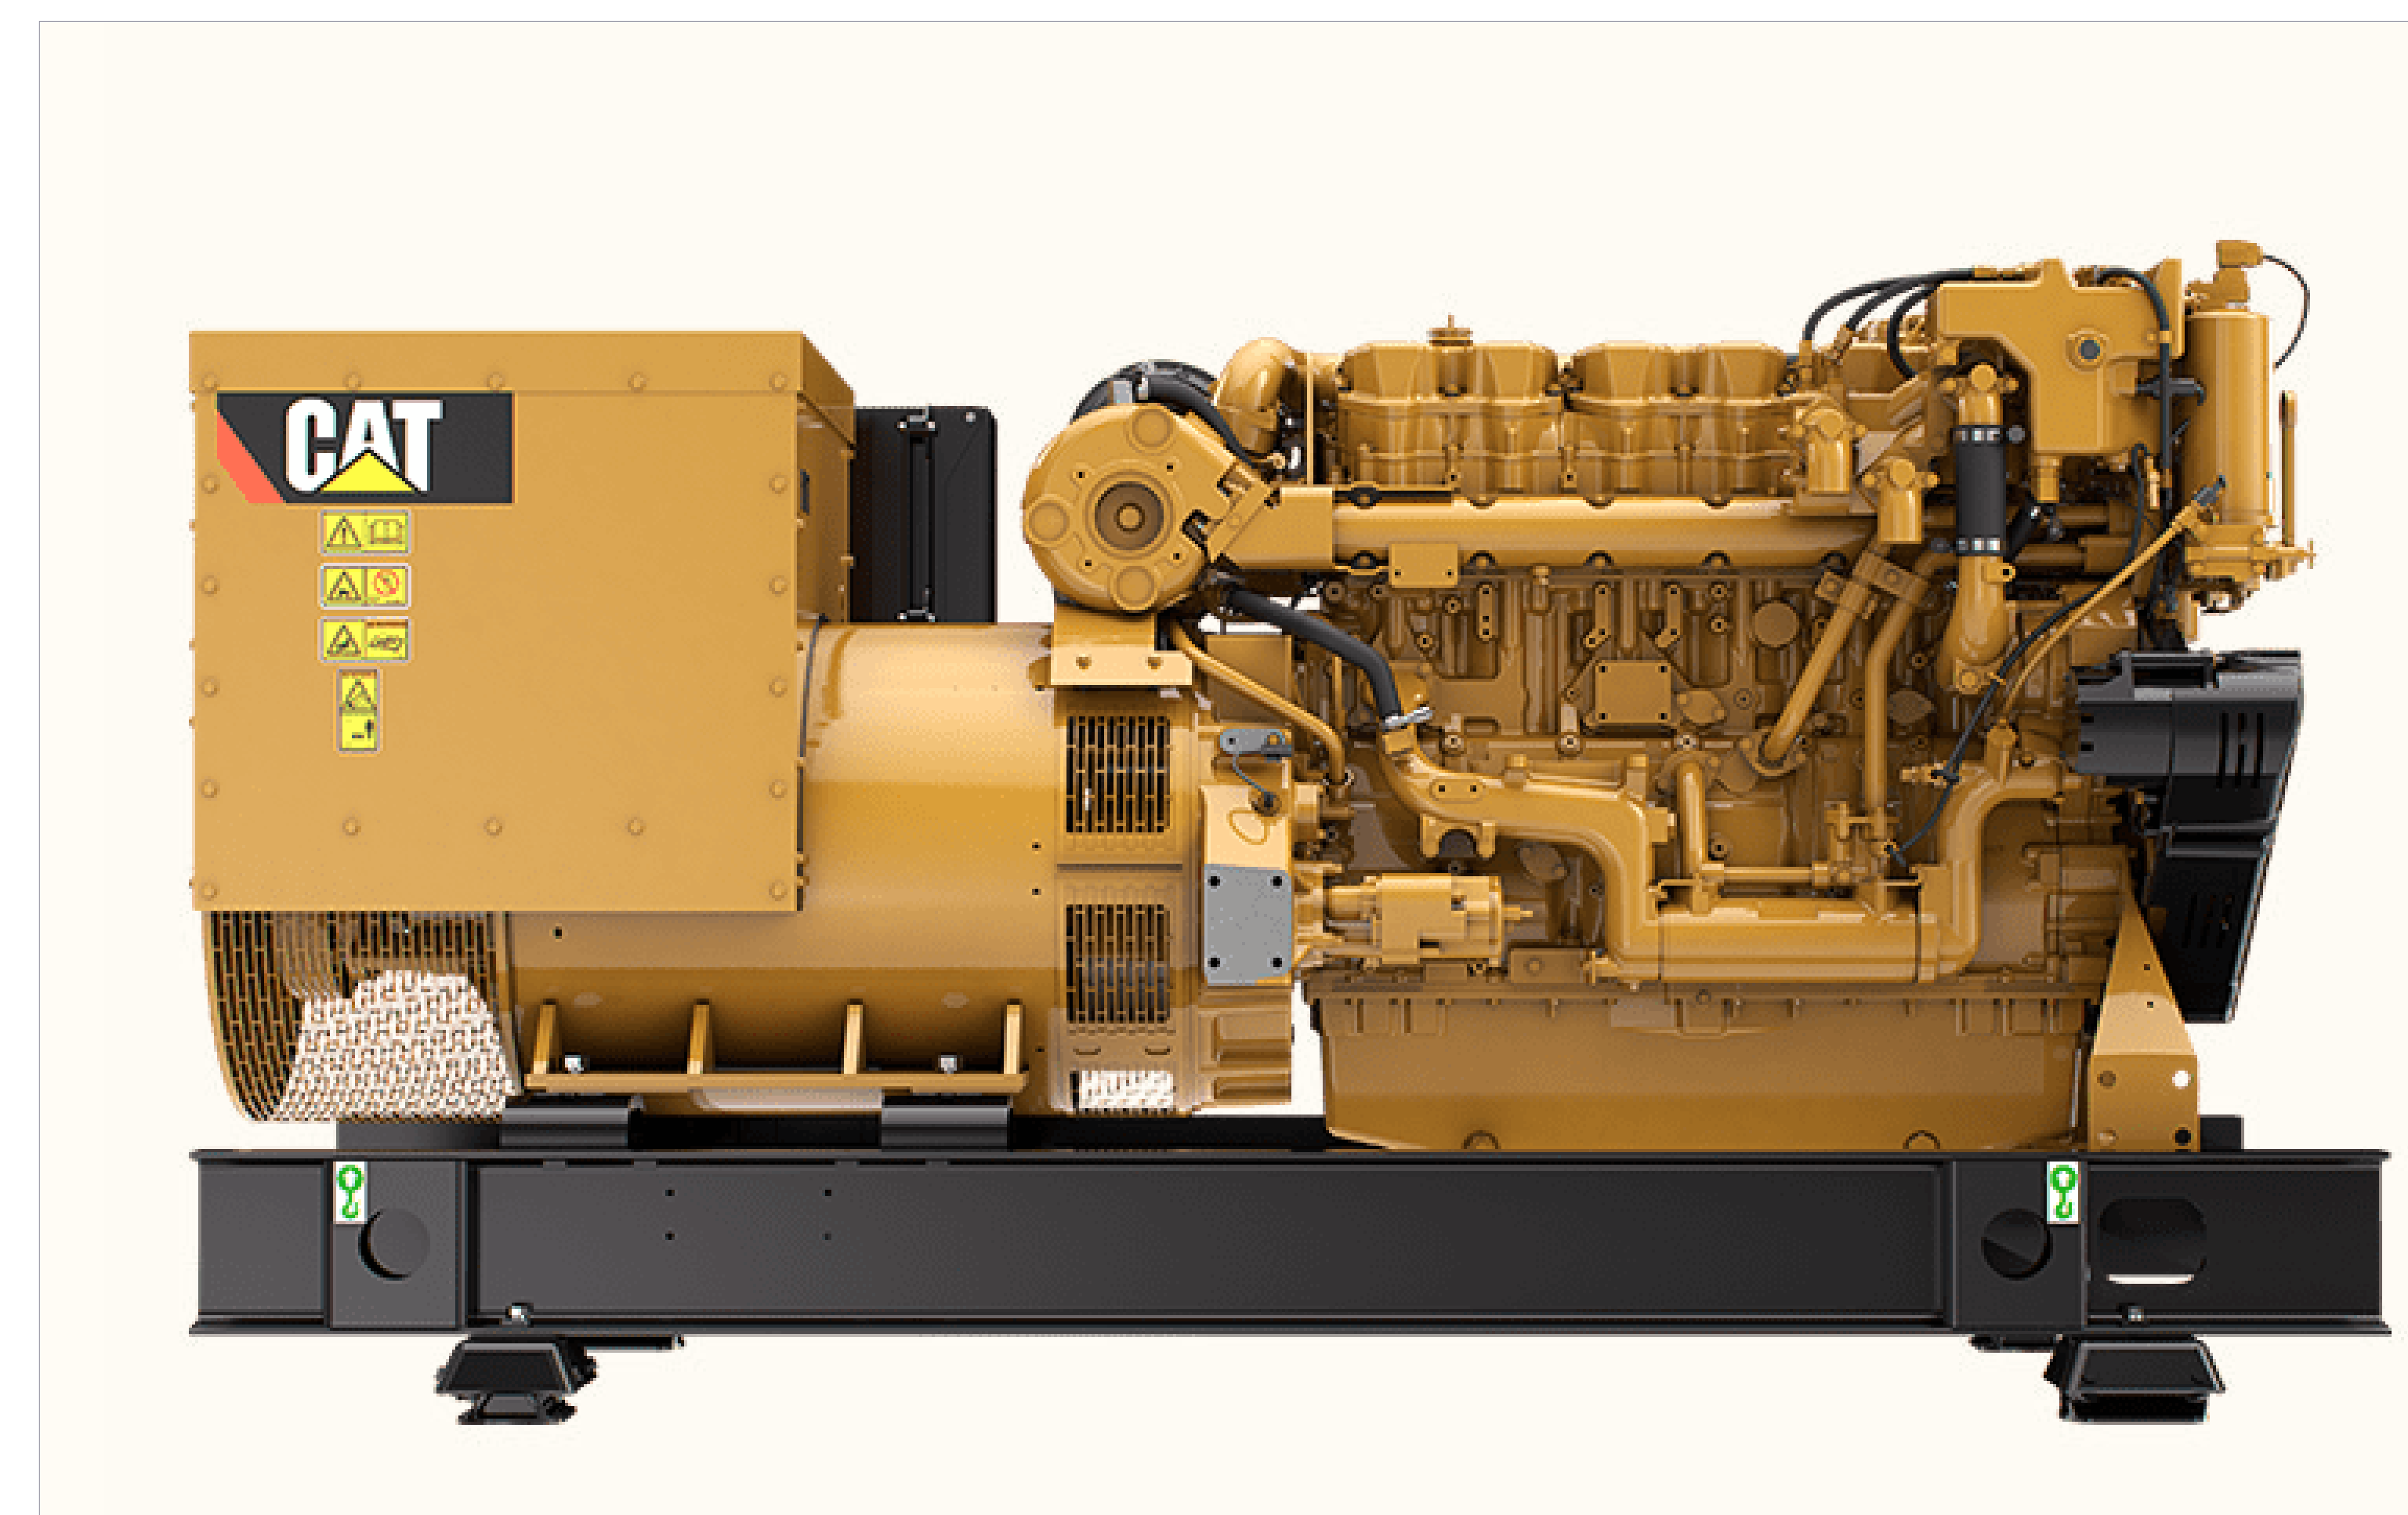

OUR SERVICES:

Generator Rental:

Providing flexible rental options for temporary power needs, allowing businesses to access reliable energy solutions without the burden of long-term investments.

OUR SERVICES:

Generator Maintenance:

Delivering comprehensive maintenance services to ensure optimal performance and longevity of generator systems, minimizing downtime and maximizing productivity.

OUR SERVICES:

Custom Fabrication:

Specializing in custom fabrication of generator enclosures, diesel tanks, and other essential components, catering to unique specifications and requirements with precision and efficiency.

OUR SERVICES:

Exhaust Systems:

Designing and installing exhaust systems for generators to ensure safe and efficient emission management, complying with environmental regulations and industry standards.

OUR SERVICES:

Barrels and Containers:

Fabricating barrels and containers for storing fuel and other essential materials, providing secure and durable solutions for various industrial applications.

ACHIEVEMENTS

OUR ACHIEVEMENTS:

At Al-Attal Integrated Energy Company, we take pride in our accomplishments, demonstrating our commitment to excellence and innovation in the energy sector. Here are some notable achievements that showcase our capabilities and expertise:

1. 'Aladdin' Film Productions.
2. Designing and Implementing Water Transfer Projects.
3. Sofex Jordan.
4. Aqaba Commercial Port.

These achievements underscore our dedication to delivering innovative and reliable energy solutions, solidifying our reputation as a trusted partner in the energy industry. We remain committed to exceeding expectations and driving progress through our continued pursuit of excellence.

OUR ACHIEVEMENTS:

1- 'Aladdin' Film Productions:

Al-Atal, a subsidiary of Al-Attal Integrated Energy Company based in Jordan, successfully provided complete generator solutions for renowned film productions, including the filming of "Aladdin" in Petra and Wadi Rum, Jordan. Our mobile generator units facilitated seamless power supply for on-location filming, demonstrating our capability to support large-scale productions with versatile and reliable power solutions.

OUR ACHIEVEMENTS:

2- Designing and Implementing Water Transfer Projects:

We spearheaded the design and implementation of a comprehensive water transfer project in Jordan, capable of delivering 2 megawatts of power. This project showcased our ability to undertake large-scale endeavors, utilizing mobile and transportable generator units to meet dynamic project requirements efficiently.

OUR ACHIEVEMENTS:

3- Sofex Jordan:

We played a pivotal role in supplying power for defense exhibitions, such as SOFEX (Special Operations Forces Exhibition) in Jordan. Our team was responsible for providing complete power solutions for the exhibition, including a project with an operational capacity of 10 megawatts, highlighting our reliability and capability to support critical events and infrastructure.

OUR ACHIEVEMENTS:

4- Aqaba Commercial Port:

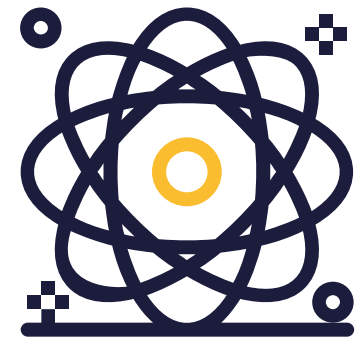

We are proud to contribute to the energy needs of commercial ports, including the Aqaba Port in Jordan. Our tailored power solutions ensure uninterrupted energy supply, supporting port operations and facilitating trade and commerce in the region.

COMMITMENT

OUR COMMITMENT:

Our dedication at Al-Attal Integrated Energy Company is not just lip service; it permeates our entire business. In order to guarantee that our clients get nothing less than first-rate products and services, we commit to maintaining the greatest standards of quality, sustainability, and customer happiness. Let me explain how we will fulfill our promise:

Excellence:

Embracing cutting-edge technological developments and employing state-of-the-art CNC equipment to guarantee accuracy and quality in our manufacturing processes are part of our commitment to excellence. By always pushing the boundaries of what's possible, we are able to provide our clients with state-of-the-art solutions that adapt to their changing needs in the energy sector.

Sustainability:

Eco-friendliness is fundamental to our company philosophy, which leads us to our third point: sustainability. We are committed to lowering our environmental effect and carbon footprint through the use of sustainable business practices. Our first priority is responsible resource management so that we can leave the earth in better shape for generations to come. This includes using sustainable materials and making energy efficiency improvements.

OUR COMMITMENT:

Employee Development:

We see our employees as our most valuable resource, thus we make an effort to help them improve professionally. Our team members are equipped to thrive in their positions and make valuable contributions to our overall performance because of our commitment to continuous training and development. We prepare our staff to face the demands of a dynamic industry by encouraging a mindset of constant learning and development.

Product Warranty:

We offer a thorough two-year manufacturer guarantee on all of our goods because we are confident in their quality and dependability. With this warranty in place, our customers can rest assured that our products will last and work as advertised. With our unwavering dedication to quality, we go above and beyond to make sure our clients are completely satisfied with their investment, even after the sale.
